

Call for Fertilizer Funds Proposals:

The Fertilizer Advisory Committee will hold their annual meeting at MSU in Bozeman in February of each year (dates to be determined). We will hear progress reports from the current FY funded projects, and consider proposals for the next FY funding.

As a reminder, the intent of these research dollars is “to improve Montana’s economy by providing farmers and ranchers the most accurate information possible about fertilizer use and soil management for greatest profits consistent with environmental protections on the many varied soil and climatic conditions of the state.” Faculty should keep this in mind as they prepare a proposal.

Please provide budget splits between PIs and departments on your budget table (format as needed).

REMINDER: Funds for these proposals are not available until July 1 of each fiscal year.

Faculty interested in submitting should use the *following format* for the proposal:

- 1. Project Name
- 2. Principal Investigators and Cooperators
- 3. Introduction & Justification
- 4. Objectives
- 5. Materials and Methods
- 6. Expected Results
- 7. Relevance to Montana Agriculture
- 8. Proposed Budget (¹table format below)
- 9. Budget Justification
- 10. References (minimal)

¹Budget table format (Add rows as needed):

There is a six (6) page limit. Please send an electronic copy to paceley@montana.edu **no later than mid-January (date to be determined each year)**
 An OSP Proposal Clearance Form is not needed.
