

## **Agri-Coach® Job Description**

As an AGRI-TREND Agri-Coach for Torgerson's, LLC, your daily activity includes working with farm customers assisting them in the decision-making processes related to agronomy. Agri-Coaches are passionate about working in the area of agronomy. They provide tools and products that collect useful information and develop sound cropping and nutrient management strategies. When clients are ready to shift their focus to precision, an Agri-Coach can ensure this transition is agronomy based. Their role and objective is to ensure that the customer is maximizing the potential of the resources available to them. As an embedded Agri-Coach with the dealership, this individual will be the go-to agronomy expert at this location, providing and training agronomy knowledge to co-workers.

An Agri-Coach must have sound understanding of soil, water and crop interactions and willingness to work as part of a team. Having knowledge of local farming practices is of benefit. Agri-Coaches receive their training and resources from AGRI-TREND Agrology Ltd (ATAL).

Agri-Coaches receive extensive agronomic training. They make agronomic recommendations based on the best options for the customer. They abide by an Agri-Coach Code of Ethics and always agree to work together with other trusted advisors of the customer to reach economic returns. Agri-Coaches are not consultants, their directive is to educate, train and coach their clients to a higher level of profitability.

The location of this position is for placement at Torgerson's, LLC, in Havre, Montana.

### **Intern – Coach in Training Job Responsibilities Include:**

- Have an interest in the general focus area of the coaching discipline
- Perform entry level activities under direct and daily supervision of a certified AGRI-TREND Coach, which may include field scouting, tissue sampling, and soil sampling
- Be responsible for data entry using AGRI-DATA Software & Mobile App
- Have a valid driver's license
- Aid in the decision-making process of customers for decisions related to agronomy
- Look for integrated agronomic solutions and opportunities for farmers
- Provide up to date agronomy and precision knowledge to dealership

### **Requirements:**

- Plan or be enrolled in a post-secondary education degree or diploma in Agronomy, Soil Science or related areas.
- Previous crop scouting experience is a plus.
- Ability to balance high producer agronomic challenges through-out growing season.
- Willingness to perform agronomic tasks during non-traditional working hours.
- Strong agronomic knowledge.
- Must be innovative in thinking.
- Proficient computer skills in Microsoft Office, as well as the flexibility of learning new agronomy and data driven software.
- Follow all company standards based on the employee, drug & alcohol and safety handbooks.
- Valid driver's license.
- Perform moderate walking, standing, climbing, lifting, stooping, bending, kneeling and reaching. Work outside and inside, in awkward or uncomfortable positions, around machinery with moving parts. Frequent exposure to dampness and humidity, exhaust fumes, gasoline and diesel fuels.
