Stand up and cheer, your Bobcats are FCS national champions! After 41 years, the championship has returned to Bozeman, and we could not be prouder!

A Message from the Dean

Dear colleagues,

What an exciting and heart-stopping way to start a new year: with a football championship after 40+ years! I hope this success is a harbinger of many new things to come and wish you a year full of growth and learning.

As we start the new year, I want to take this opportunity to thank you for a wonderful year of teaching, supporting our students and conducting impactful research and outreach. Also, congratulations to the 2025 December graduates and everyone who contributed to getting them to the finish line. The impact of your work goes beyond our campus to all of Montana and beyond.

Our college had a great year in 2025. Based on fall data, we have over 2,000 majors enrolled in the college, our second-largest enrollment ever. We are making improvements in student retention and success – thanks to your hard work in and outside of the classroom. We continue to be MSU's #1 college in research expenditures, with over \$54 M in FY25.

Overall, our college is in excellent shape, thanks to our amazing faculty, staff and students and our many partners and advocates across Montana. Once again, thank you for all your contributions that make our college the best and instill that Bobcat pride across our state and beyond!

Accomplishments and Highlights

Dr. Lisa Rew of the Department of Land Resources and Environmental Sciences

was awarded the Western Society of Weed Science Outstanding Weed Scientist Award in the public sector category. This well-deserved award is in recognition of her significant contributions to the discipline. Congratulations, Dr. Rew!

Reminder: Please continue to submit impact statements for your research projects! These short summaries help to reinforce the importance of agricultural sciences to governmental and funding agencies. Submission takes five minutes, and you can complete it by scanning the QR code or [visiting this webpage](#).

Accomplishments and Highlights

Students in **LARC 432 Site Design Studio II** partnered with the City of Bozeman Parks and Recreation, InContour Landscape Architecture and the new Hyalite View neighborhood to develop Master Plan ideas for Cedarview Park, a 4.5-acre neighborhood park that will be getting a new playground and trail system.

At a neighborhood meeting in December, associate professor **Rebekah VanWieren** and **eight landscape design majors** presented four park concepts and facilitated activities to gather feedback and develop a shared vision for the space. This community-engaged teaching and learning project also resulted in four design posters and a 100+ page report, and partnered with MSU's Geospatial Core Facility to use UAV data in the design process.
